## Structure of Question paper (Theory)

1. There will be one theory paper. The student has to attempt 29 questions as per the directions given below:
2. Question No. 1 to 20 will be of two marks each.
3. Question no 21 to 26 will be of three marks each. Candidate has to attempt any 6 questions out of 12 questions.
4. Question no 27-29 will be of four marks each. Candidate has to attempt any 3 questions out of 6 questions. There will be $100 \%$ internal choice in each question.
5. Distribution of marks over different dimensions of the paper will be as follows.

| Learning <br> outcomes | Marks | Percentage of Marks |
| :--- | :--- | :--- |
| Knowledge | 47 | $67 \%$ |
| Understanding | 16 | $23 \%$ |
| Application | 07 | $10 \%$ |
| Total | 70 | $100 \%$ |

6. There will be $67 \%$ questions of objective type carrying 2 marks
a. (i) $17 \%$ multiple choice questions
(ii) $17 \%$ match the following
(iii) $17 \%$ fill in the blanks with given options
(iv) $16 \%$ true of false type.
b. $23 \%$ questions of very short answer type, can be answered in 2 to 3 lines. Each question will be of 3 marks each.
c. $10 \%$ questions will be of short type. Each question carry 4 marks. These questions will be on the basis of pattern given below.
i. Labelling or draw the diagram
ii. Similarities and differences
iii. Ask to give example
iv. Advantages and disadvantages

## INSTRUCTION FOR PAPER SETTER

1. There will be one theory paper and student has to attempt 29 question as per the directions.
2. Question no 1 to 20 will be of 2 marks each. Paper setter should set the question paper as per the direction given above. Out of 20 objective type questions, 5 question should multiple choice, 5 question should be of match the following type, 5 questions fill in the blanks and 5 questions are true/false type.
3. Question no 21 to 26 will be of 3 marks each. Out of total 12 questions candidate have to attempt 6 questions.
4. Question no $27-29$ will be of 4 marks each. These questions will have 100\% internal choice.
