Theory: 70 Marks
Practical: 25 Marks
I.N.A.: 05 Marks

Total: $\mathbf{1 0 0}$ Marks

## STRUCTURE OF QUESTION PAPER (THEORY)

1. There will be one theory paper comprising of 16 questions.
2. Question No 1 will be carrying 28 objective type questions of 1 mark each. In objective type questions there will be 23 multiple choice questions and 5 questions will be of true/false statement. All these 28 objective type questions will be knowledge based and understanding based not application based.
3. Question number 2 to 8 (Total 7 questions) will be carrying 2 marks each. There will be three questions of internal choice from unit-I, unit-II and unitVII. Each one will have one theory type question and one numerical type in choice.
4. Question number 9 to 14 (Total 6 questions) will be carrying 3 marks each. There will be three questions of internal choice from unit-III, unit-IV and unit-VI. Each one will have one theory type question and one numerical type in choice.
5. Question number 15 and 16 will be carrying 5 marks each and there will be internal choice of each of all these questions. From unit-VI (Optics) internal choice question will have one question from ray-optics and choice question from wave-optics. 5 marks question may be asked in parts.
6. Distribution of marks over different dimensions of the paper will be as follows.

| LEARNING OUTCOMES | MARKS | PERCENTAGE OF <br> MARKS |
| :--- | :---: | :---: |
| KNOWLEDGE | 26 | $36 \%$ |
| UNDERSTANDING | 30 | $44 \%$ |
| APPLICATION | 14 | $20 \%$ |
| Total | $\mathbf{7 0}$ | $\mathbf{1 0 0} \%$ |

7. In the category of one mark question there will be objective type question such as multiple choice and true/false.
8. Use of un-programmable calculator is allowed. The log tables can be used.
9. Total weightage of numerical will be $20 \%$ i.e approximate 15 marks. There will be 3 numericals of 2 marks each and 3 numerical of 3 marks each. These numericals will cover application based part of learning outcomes.

## UNIT WISE DISTRIBUTION OF MARKS

| Unit No. | Title | Marks |
| :--- | :--- | :---: |
| UNIT-I | Electrostatics | 09 |
| UNIT-II | Current Electricity | 07 |
| UNIT-III | Magnetic effects of current and magnetism | 10 |
| UNIT-IV | Electromagnetic Induction \& current | 07 |
| UNIT-V | Electromagnetic waves | 04 |
| UNIT-VI | Optics | 14 |
| UNIT-VII | Dual nature of matter | 05 |
| UNIT-VIII | Atoms and Nuclei | 07 |
| UNIT-IX | Electronics devices | 07 |
|  | Total Marks | $\mathbf{7 0}$ |

## SCHEMATIC DISTRIBUTION OF MARKS

| UNIT | Title | 1 Mark Question | 2 Marks Question | 3 Marks Question | 5 Marks Question | Total Marks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Electrostatic | 02 | 01 or N | - | 01 | 09 |
| 2 | Current Electricity | 02 | 01 or N | 01 | - | 07 |
| 3 | Magnetic effects of current \& magnetism | 05 | 01 | 01 or N | - | 10 |
| 4 | Electromagnetic Induction \& Alternating current | 02 | 01 | 01 or N | - | 07 |
| 5 | Electromagnetic waves | 02 | 01 | - | - | 04 |
| 6 | Optics | 06 | - | 01 or N | 01 | 14 |
| 7 | Dual Nature of matter | 03 | 01 or N | - | - | 05 |
| 8 | Atoms \& Nuclei | 02 | 01 | 01 | - | 07 |
| 9 | Electronic devices | 04 | - | 01 | - | 07 |
| Total Questions |  | $\begin{gathered} 1 \text { (28 Sub- } \\ \text { parts) } \end{gathered}$ | 7 | 6 | 2 | 16 |
| Total Marks |  | 28 | 14 | 18 | 10 | 70 |

## INSTRUCTION FOR PAPER SETTER

Note:There will be one theory paper comprising of total 16 questions.

1. Question No 1 will be carrying 28 objective type questions of 1 mark each. In objective type questions there will be 23 multiple choice questions and 5 questions will be of true/false statement. All these 28 objective type questions will be knowledge based and understanding based not application based.
2. Question number 2 to 8 (Total 7 questions) will be carrying 2 marks each. There will be 3 questions of internal choice from unit-I, unit-II and unit-VII. Each one will have one theory type question and one numerical type in choice.
3. Question number 9 to 14 (Total 6 questions) will be carrying 3 marks each. There will be three questions of internal choice from unit-III, unit-IV and unit-VI. Each one will have one theory type question and one numerical type in choice.
4. Question number 15 and 16 will be carrying 5 marks each and there will be internal choice of each of all these questions. From unit-VI (Optics) internal
choice question will have one question from ray-optics and choice question from wave-optics. 5 marks question may be asked in parts.
5. Question paper should cover all the syllabus.
6. No question or topic should be repeated in the question paper.
7. Questions in the paper can be asked only from mentioned PSEB syllabus. Questions from any topic which is not mentioned in the syllabus will be considered as out of syllabus question.
8. All 3 sets must be of equal standard and difficulty level of questions should be same in each set.
9. At the end of each question, paper setter must write detailed distribution of marks of each sub-question.
10. Confusing statement type question should not be asked in the paper.
11. Language used should be clearly understood \& specific.
12. Time and length limit of paper should be kept in mind while setting the paper.
13. Questions paper should be made according to knowledge, understanding and application part of learning outcomes as shown in the marks distribution.
