## 1. Subject Vision

The course includes practical skills like how to use different hairdressing tools safely, how to choose the right haircut or color for someone, and how to do various hair treatments without harming the scalp. They will learn cutting, coloring, and styling hair in many ways. Students will explore natural remedies for hair and scalp care, showing how to use them effectively. We aim to prepare students for a successful career in the beauty industry, ready to meet the needs of their clients with creativity and care. Additionally, they will have fun learning about new trends and coming up with their own hairstyling ideas.

Health and safety are very important in salons, so this course will teach students how to keep their workspace clean and safe. They'll learn how to spot and avoid things that could make people sick, and how to organize their tools properly to avoid accidents. They will also learn how to talk to clients to understand what they want and cater to their needs with personalized hair care treatments.

## 2. Curricular Goals and Competencies

### CG1: Enjoy exploring and be confident in sharing about the beauty and wellness industry, current trends, and career opportunities with others

- C1: Understand the evolution and significance of beauty and wellness industry and appreciate its influence on current practices
- C2: Understand the functional difference across salon types, recognize various job roles in the beauty industry and identify essential skills required for various roles
- C2: Identify and differentiate between various hair styling methods and tools, developing an appreciation for their role in creating diverse looks and hairstyles in the beauty industry.
- C3: Explore own interests and strengths, identify aspirations and goals, and recognize the target job/ career pathway
- C4: Enjoy the process of discovering new trends and designing creative hairstyles and makeup ideas

### CG 2: Gain understanding of various health and safety protocols in a salon environment and ability to maintain a clean and organized work area

- C1: Learn about health and safety protocols in a salon to limit risks and hazards
- C2: Analyze/ scan the salon environment for risks of cross-contamination and infections and implement safety and hygiene practices
- C3: Segregate tools and chemicals based on safety and health hazards
- C4: Analyze work area to determine the most efficient method for storing and organizing tools/equipment after use

### CG 3: Develop client consultation expertise and ability to curate personalized treatment/ service offerings for the client

- C1: Operate salon management software to schedule/modify client appointments
- C1: Apply Hair Science Knowledge to Advise on Hair Health and Care Description according to hair structure, porosity, elasticity, and texture to offer personalized advice and solutions for maintaining and improving hair health.
- C2: Maintain professional workplace appearance and utilize effective communication skills to deal with clients
- C3: Understand needs of the client, curate personalized service offerings and post treatment care routine
- C4: Use effective sales techniques to promote/sell products and upsell services
- C5: Operate CRM module in the salon management software and use detailed records of client consultations for curating targeted marketing plan
